

THE LEADING PROVIDER OF DEMAND RESPONSE RESOURCES IN THE UNITED STATES

NAPP's Customer-centric Programs

NAPP identifies and manages customer specific load reduction and generation strategies

NAPP offers Load Reduction Strategies that do not adversely impact overall production, operations or employee/customer satisfaction. Load reduction/asset management is carefully balanced between a customer's needs and regional program guidelines.

Turn Facilities HVAC and Lighting into "Virtual" Power Plants

- Lighting circuit control
- Synchronize BAS Systems with operations
- Maintain fans and blowers while shutting down chillers
- Utilize the building's thermal storage by pre-cooling and pre-heating

Turn Peak Shaving Practices into New Revenue

Customers current peak shaving practices can be incorporated into an "on-call" DR program to provide additional value from these existing practices.

Optimize Flexible Processes and Practices

- Utilize inventory to adjust process schedules for call events to shut down production centers
- Shut down non-critical operations such as conveyors, motors, etc.
- Include service centers, warehouses

Asset Optimization of Onsite Generation

- Increase connected load on existing back up generators
- Maintain permits and install pollution control devices, if required
- Install additional onsite generation

A LEADING PROVIDER OF DEMAND RESPONSE RESOURCES IN THE UNITED STATES

What is Needed To Be in a NAPP DR Program?

1 Sign Contract with CSP/DRP

The first step of the program is to sign the contract with CSP/DRP. This then initiates the registration process.

1

2 Registration with the ISO or utility

You will now need to register with the ISO or the utility.

2

Demand Response Availability
